

Forward-looking Full Stack Engineer with 3.5+ YOE in end-to-end product delivery and SDLC management. Proficient in JavaScript, React, Next.js, Angular, and DSA to build scalable solutions in fast-paced environments.

SKILLS

Frontend Development React.js, Next.js, Angular (v9-v13), AngularJS, Angular CLI, Angular Material, Material-UI (MUI), Front-end Coding, Responsive Web Design	Backend & Databases Node.js, Express.js, Server-Side JavaScript, REST APIs, Representational State Transfer (REST), MongoDB
Languages JavaScript (ES6+), TypeScript, Python, HTML5, CSS3	Tools & DevOps Version Control (Git/Bitbucket), CI/CD Pipelines, Linux, Performance Optimization Tools (Lighthouse, New Relic)

EXPERIENCE

SDE I, Cleartrip	05/2026 – Present Bengaluru, India
- Spearheaded the development of a new Internal SEO dashboard using Next.js and TypeScript, improving data visualization and user engagement. - Architected and deployed a configuration-driven UI framework, eliminating development bottlenecks and enabling the marketing team to launch new campaigns instantly. - Designed and implemented a CI/CD pipeline utilizing Plexus and Bitbucket pipelines, automating deployment processes and reducing release cycles by 50%.	
Software Engineer, Adani Digital Labs	08/2023 – 05/2026 Gurugram, India
- Maintained and enhanced the white-label solution for Trainman, enabling seamless train-related features across multiple clients. - Implemented security best practices, including input validation, secure authentication mechanisms, and protection against common vulnerabilities (XSS, CSRF). - Integrated third-party APIs such as IRCTC, Razorpay, AdPushup, Google Ads, and Google Analytics. - Facilitated cross-functional communication among development, QA, and product teams using Jira and Slack during a 6-month migration project, increasing sprint delivery rate by 40% and reducing post-release defects by 25%. - Demonstrated adaptability by transitioning between Angular and Express.js tech stacks over 18 months, utilizing Jira for agile task management and achieving a 70% reduction in application load times while maintaining seamless integration of five third-party APIs to exceed SLA targets.	
Software Engineer, Trainman	01/2023 – 08/2023 Gurugram, India
- Developed and deployed a white-label integration plugin for Trainman, onboarding three companies to the platform. - Built responsive and dynamic web applications, optimizing for usability, performance, and accessibility. - Successfully migrated the Angular codebase from version 9 to 13, improving application performance by 30%. - Implemented Server-Side Rendering (SSR) for improved SEO rankings and reduced page load time from 6s to 2.5s. - Utilized performance monitoring tools like Lighthouse and New Relic to identify and resolve bottlenecks, enhancing web application performance. - Integrated Google Ads and AdPushup APIs to optimize monetization and streamline ad campaign management for improved revenue.	

EDUCATION

Bachelor of Technology (Minor in Computer Science), Starex University	2023 Gurgaon, Haryana
GPA: 8.1
